EDUCATION

2015 - 2019

REVA UNIVERSITY

- B.Tech in Electrical and Electronic engineer

SKILLS

- Informatica
- Teradata SQL
- Java
- Hibernate/JPA
- Kafka
- Snowflake
- Jira software

TOOLS

- Eclipse IDE
- Jenkin, GIT, Bitbucket
- Putty
- Jira Software

LANGUAGES

- English
- Kannada
- Hindi
- Telugu

PROFILE

Accomplished software engineer having overall 5 years of experience in data warehousing, ETL development, and real-tme data processing and Java application development. Strong expertise in Informatica PowerCenter, TeradatSQL, Java and Apache KAFKA for building scalable batch and streaming data pipelines. Skilled in performance tuning, data integration, and handling large-scale enterprise data system

WORK EXPERIENCE

Tech Mahindra (Senior Software Engineer) **2021 - 2025**

Project details : (Client - Cisco)

1.Title : Data warehouse developer

Tools and Technology : Informatica power center, Teradata SQL, control-m

- Designed and developed ETL workflow using Informatica PowerCenter
- Extracted data from source and loaded into Teradata warehouse
- Created and optimized teradata SQL queries for data transformation
- Developed mapping, sessions, workflow and reusable transformation
- Wrote Teradata SQL queries, including joins, subqueries and window functions
- Automated ETL job scheduling and monitoring using control-m , reducing manual intervention and improved reliability

2.Title : Kafka application developer

Tools and Technology : Apache Kafka, Java and Teradata SQL

- Developed backend application using Java, JPA/Hibernate implementing business logic and integrating with data source
- Consumed real-time data from Apache Kafka topics and processes messages for downstream operation
- Used Hibernate ORM to interact with Teradata SQL tables, handling entity mapping and data persistence efficiently
- Worked on CI/CD pipeline using GIT, Jenkin enabling smooth and automated deployment

Infosys (Technology Analyst) **2025 - present**

Project details : (Client - Goldman Sachs)

1.Title : Regulatory Engineer

Tools and Technology : Java, springboot,Aquadata studion and Snowflake

- Worked on a Springboot based java applicatopn for precessing and reporting trade related transaction
- Worked on optimizing aquadata studio and snowflake queries to test the data and check data processing
- Designed exception-handling logic to check trade eligibility before reporting
- Participated in code review and deployment activities
